CALL OR E-MAIL FOR INFORMATION ABOUT JOINING THE GROSSMAN FORESTRY TREE FARM GROUP

The Grossman Forestry Tree Farm Group offers landowners an efficient way to show their commitment to long term sustainable forestry. It also shows forest products companies, forest products consumers, and government agencies that the Group members are dedicated to sustainable forest management practices.

New Opportunities for Forest landowners

Public Act 378 was recently signed into law by the governor. This law allows forestlands that meet certain criteria to be exempt from the 18 mills levied by the Schools. Call or e-mail for more information.

Michigan Forestry Carbon Project creates a pilot project that allows forest landowners who meet certain criteria to sell the carbon that their forest sequesters from the atmosphere (carbon credits). Healthy forests are good for the environment providing among other things clean air (in part by sequestering carbon from the atmosphere). Call or e-mail for more information.

GROSSMAN FORESTRY COMPANY is a privately owned forestry consulting firm that assists Michigan's private landowners with forestry and wildlife management. The company currently employs seven full-time consulting foresters with secretarial support. Working as **agents of the landowner**, we provide the following services based upon the landowner's goals: stewardship plan writing, timber sale administration, forest boundary location, forest and wildlife management plans, timber market analysis, timber/land appraisal, and aerial photograph interpretation (every year we work with hundreds of clients to help them enjoy their properties). Our services are provided throughout Michigan's Eastern Upper & Northern Lower Peninsulas. As consulting foresters, we have an obligation to use our knowledge and provide the best possible service to Michigan's private landowners. www.grossmanforestry.com
